

SAWYER Premium Insect Repellent 20% PICARIDIN - 3oz spray Sawyer®

Premium Insect Repellent 20% Picaridin - 3 oz spray Picaridin is a promising new insecticide; its effect is similar to DEET, yet it is safer on gear and equipment than DEET. At 20%, this long lasting topical insect repellent is effective up to 8 hours against mosquitoes, ticks, biting flies, gnats, chiggers and fleas. Picaridin is more effective at repelling biting flies than DEET. Our 20% Picaridin is virtually odorless; It has a mild citrus scent added to it which quickly evaporates away. WILL NOT HARM GEAR OR EQUIPMENT!

Sawyer Premium ULTRA 30™ Insect Repellent Lotion, 3OZ NEW - This Liposome-based repellent is the newest advancement in insect repellent technology. The Liposome base enables the 30% DEET lotion to be very cosmetically appealing and non-greasy, with little to no odor. Liposomes hold the DEET in place on the skin and reduce absorption.

Liposomes are used to protect and deliver various active ingredients useful for our health and well-being. They are used in medicines, vitamins, vaccines, and cosmetics. They protect these active ingredients by providing a package that is completely safe to our body, and that allows the delivery to take place over a longer period of time. Liposomes are one of the best systems for Controlled Release.

Ultra 30™ uses a liposome controlled release system similar to the earlier generation of polymer-based controlled release systems (3M Ultrathon® and Sawyer®). The liposome envelops the DEET and slowly time-releases it as needed, thereby extending the effectiveness of the repellent. Unlike polymers, however, liposomes are a natural compound which is more comfortable to the skin and easier to wear.

- ODORLESS AFTER APPLICATION
- NON GREASY
- NON STAINING
- RESISTS PERSPIRATION

- EFFECTIVE FOR UP TO 12 HOURS

MAXI-DEET 100% low odor 2oz pegable box Sawyer® Premium MAXI-DEET® Insect Repellent - 2 oz spray In areas of extreme bug density or other extreme conditions you can rely on this 100% DEET for application to clothing, mosquito or head nets. Sawyer® makes the only Low-Odor 100% DEET on the market. We achieve this through extra refinement which results in a purer DEET.

Our new low-odor, 100% DEET insect repellent comes in a convenient 2 oz spray pump applicator for an easy-to-apply, even coating.

- Field-tested to offer proven effectiveness against bugs for up to 10 hours
- Protects against mosquitoes, chiggers, ticks, deer flies, black flies, stable flies, gnats and fleas
- Can be applied to shoes, socks and some clothing

A little goes a long way... so use as needed. There is little reason to use anything other than 100% DEET. You can control dosage by using a smaller amount rather than a lower concentration. Lower concentrations have more alcohol, which increases absorption and causes more skin irritation.

Clothing Insect Repellent 24 oz Trigger Spray

Not only does this product *repel* insects, but will actually *kill* ticks, mosquitoes, chiggers, mites and more than 55 other kinds of insects. Sawyer® Permethrin repellent is for use on your clothing, tents and other gear. A single application lasts through 6 washings. Permethrin is odorless when dry. During the drying process it tightly bonds with the fibers of the treated garment. It will not stain or damage clothing, fabrics, plastics, finished surfaces, or any of your outdoor gear. The NEW 24 oz trigger sprays provide protection from mosquitoes and ticks through 6 washings.

Permethrin clothing treatments, when applied following *Directions for Use*, have been determined to have "spatial repellency" against mosquitoes. This means that mosquitoes will swarm around you, but not light on your treated clothing and bite.

Use by itself, or with skin applied repellents to build the ultimate protective barrier. Permethrin is a contact insecticide but non-toxic to humans.

Clothing Premium Insect Repellent- 6oz aerosol

Not only does this product *repel* insects, but will actually *kill* ticks, mosquitoes, chiggers, mites and more than 55 other kinds of insects. Sawyer® Permethrin repellent is for use on your clothing, tents and other gear. Permethrin is odorless when dry. During the drying process it tightly bonds with the fibers of the treated garment. It will not stain or damage clothing, fabrics, plastics, finished surfaces, or any of your outdoor gear. Aerosol applications can last up to six weeks and through several washings.

Permethrin clothing treatments, when applied following *Directions for Use*, have been determined to have "spatial repellency" against mosquitoes. This means that mosquitoes will swarm around you, but not light on your treated clothing and bite.

Use by itself, or with skin applied repellents to build the ultimate protective barrier. Permethrin is a contact insecticide but non-toxic to humans.

Kit Includes:

One 34 oz BPA FREE Durable Water Bottle with a flip-top cap

One 0.10 Absolute Micron Water Filter

Two Replacement Drinking Straws

One Cleaning Syringe

Cleaning and Maintenance Instructions

For the outdoor enthusiast or traveler that prefers to drink from a bottle, this is the system for you. You simply fill the bottle, drop in the filter and drink.

The rugged, but lightweight HDPE, bottle makes it great to reduce weight while hiking.

The flip top cap also fits a standard hard bottle for the times when you prefer those. You can also splice this filter directly in-line on your drink tube of your hydration bladder, attach a drink tube and drink directly from a water source or use it in a gravity feed system for group applications.

Unlike most pump style filters, this filter does not have an activated carbon core so the beneficial ingredients in an electrolyte replenishment solution will not be filtered out of your bottle.

With 98% of the water flow passing through the hollow fiber membranes, it is a very fast flowing filter.

The design of the filter allows you to back wash it with the enclosed syringe and reuse it over and over again, thus virtually making this the last filter you will ever need to buy as long as you follow the care and use instructions.

*Filters water with the highest level of filtration available, 0.10 Micron Absolute, other than our 0.02 Micron Absolute filters

Sawyer Point One Squeeze Water Filter System w/ 3 Pouches The NEW Sawyer Squeeze Filter is the lightest and most versatile filtration system on the market. With a total field weight of 3 ounces and ability to roll up, it takes up virtually no space in your pack. This product includes 3 pouches (12oz, 16oz and 32oz) that can be reused hundreds of times. A larger 2 liter capacity bag is also available.

Simply fill up the pouch of your choice at a lake, stream or river, screw the filter directly onto the pouch and

- 1) Squeeze the bag and filter water into your water bottle or container of choice.
- 2) Drink directly from the filter which has a built in push pull cap for on/off functions.
- 3) Attach the filter onto most threaded water bottles including 2 liter bottles.

The Squeeze filter is perfect for traveling abroad where tap and bottle water cannot be trusted.

Stay Put System 1 SPF 30* - 1 OZ SAWYER® STAY PUT® SUNBLOCK - SPF 30 This unique Breathable Matrix Formula spreads the application into all layers of your skin including the deeper layers where other sunblocks do not go. The result is a much more comfortable feel and an application which is not as subject to surface skin activities such as rubbing, exposure to water or sweating, as other formulas. You stay cooler, preserve more energy and get longer lasting protection as your sweat passes around the sunblocks which have bonded to your various skin layers. All the protection in this PABA free lotion without the greasy feel.

- Waterproof
- Sweat resistant
- UVA/UVB protection
- Bonding Base Formula

Breathable Matrix Formula - The result is long-lasting protection in a PABA free non-greasy lotion
