

YELLOW FEVER VACCINE UPDATE

1. Yellow fever vaccine is a live virus vaccine. It may be contraindicated for certain people.
2. Certain countries or travel agents or cruise administrators may require proof of yellow fever administration.
3. We may provide a Yellow Fever Exemption Certificate, depending on patient's itinerary and health history.
4. If the yellow fever vaccine has been administered by a certified yellow fever center, it gives protection against yellow fever for life.
5. There is only one pharmaceutical company that produces the yellow fever vaccine in the US. That company will not be able to provide the vaccine in the US until summer, 2019. The clinics that provide yellow fever vaccine obtain the vaccine produced in France.
